Velodrome Vysočina Singletracks - Nové Město na Moravě

The mountain bike trails in Nové Město continues the tradition of MTB racing in Nové Město. The project was created by Lukáš Vlach and Jan Skříčka, members of the MTB World Championship organization committee. They designed the trails so that they are enjoyable for a wide range of cyclists.

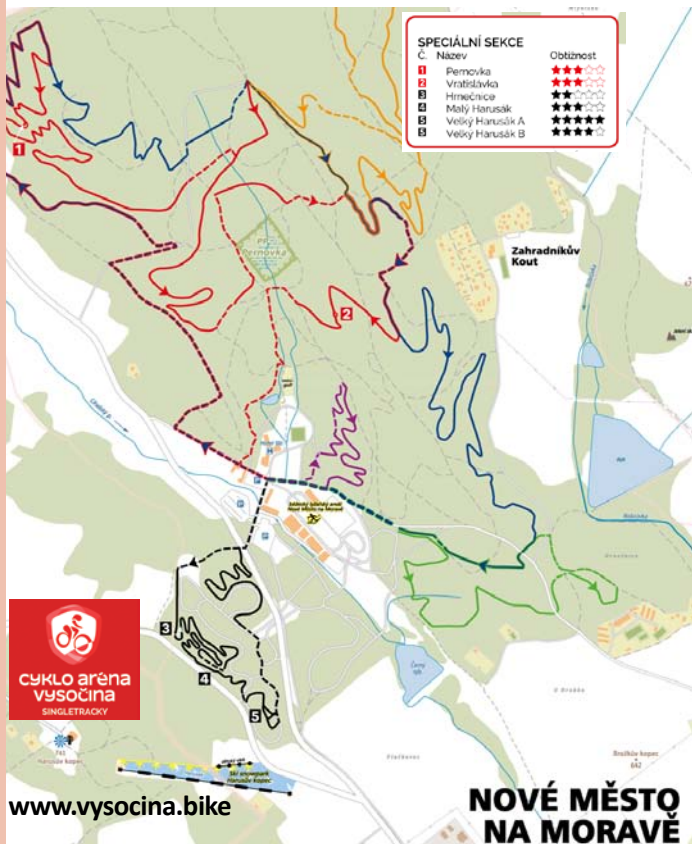

Everyone can find a suitable trail depending on their level of fitness and technical abilities. There are technically easy, fun and safe trails for children; natural trails suitable for wheelchairs or handbikes designed for cyclists with disabilities; as well as very demanding trails for experienced cyclists. The level of the trails is based on current trends of trails built for the MTB World Championship.

They are open from 15th April to 31st October

www.vysocina.bike

The trails are 30 km long with 5 levels of difficulty:

- **black** (for experienced cyclists, with extreme parts)
